

# Corrigenda and Amendments

# Corrigenda

- Part 1: Architecture [January 2007]
- Part 2: Generic card interface [September 2008]
- Part 3: Application interface [November 2008]
  - COR 1: primarily ASN.1 [ballot closes 19-Dec]
- Part 4: API administration [October 2008]
  - COR 1: ASN.1 [ballot closes Jan]
- Part 5: Testing [FCD ballot to close in March]
- Part 6: Authentication Protocol Registration Authority [FDIS to close in December]

# ISO/IEC 24727-3 Cor 1

- Clarification on scope and duration of Differential Identity Authentication state
- Correction and Completion of ASN.1
  - Separate in to COMMON, API and ALGO ASN.1 Modules
  - Support Extensibility
  - Automatic tagging

# ISO/IEC 24727-4 Cor 1

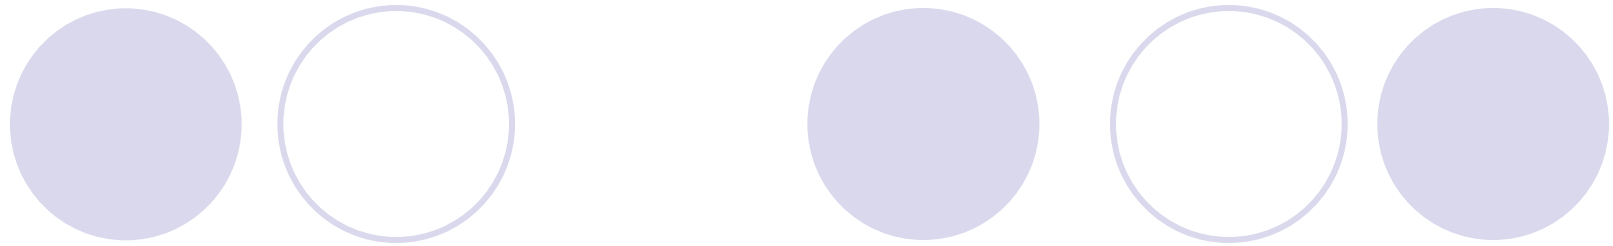

- IFD-API ASN.1 Module
- TC-API ASN.1 Module
- Same considerations as for ASN.1 work in ISO/IEC 24727-3 Cor 1
  - Independent modules
  - Automatic tagging
  - Extensibility implied

# ISO/IEC 24727 Amendments

- WG4 May 2009 Meeting – consider scope
- WG4 October 2009 Meeting – define scope for NWIPs on -2, -3 and -4
  - -1 is up for Maintenance
- Ballots open on NWIPs and U.S. position given by ballot

# ISO/IEC 24727 Amendment Topics

- Add XML/XSD definitions for all APIs and structures (-3)
  - Parallel, but derivative work from ASN.1 to support “web services” access to SALII
- Enhance discovery mechanism (-2)
- Clarify “ICC Resident Stack” configuration (-4)
- Bring ISO/IEC 7816-13 concepts/structures to SALII (-3)
- Add detail to Registry/real-card mapping & discovery (-3)
- Maintenance Update to bring consistency with -2, -3, -4, -5, -6 (-1)
- Relocate APs to -6, bindings to respective parts
