

***Moving into a Future of Training  
and Education Centered Around  
Lifelong Learning***

**(ISC)<sup>2</sup><sup>®</sup>**

# Objectives

Attendees gain an understanding of the importance of:

- Identifying and solving industry needs
- Aligning curriculum
- Expanding delivery methods
- Industry best practices - compliance and regulation
- Evaluating effectiveness

Shortened “viable life” of information

What does this mean?

# Why is life long learning important?

# My story..

# Foundations in lifelong learning

# From the basics to the beginning

# A holistic approach

# Aligning Curriculum

# Expanding the horizon

# Best practices

# How do we evaluate effectiveness?

# Applying this to mainstream learning

What is the impact when gaps in knowledge exist?

# Learning continuum

## Planned Learning

- Classroom learning
- Self-paced/Virtual Learning
- Online Assessments

## Informal Learning

- Social networking – blogs, wikis, tweets/micro sharing
- Communities of Practice
- Innovation and crowd sourcing

## On-demand Learning

- Podcasts and ebooks/ibooks
- Learning apps, job aids
- Web-based training, learning videos

## Career Learning

- Certification/specialized training
- Special projects
- Coaching/Mentoring

# How do you begin to close the gap?

## Early onboarding

Very basic knowledge acquisition – begin the onboarding process

## Universities and Academia

Provide the foundational knowledge needed to be successful

## Professional Development

Increased opportunities for expanding knowledge, skills, and abilities through professional development and/or certification training

# Interesting perspective...
