SchemaMis Change Log
(3/22/2024)

Date	Version	Changes	Notes
11/17/2023	2.8.0		Baseline Version
11/29/2023	2.8.1	labInfo.labId renamed to labInfo.labCode	
		removed unnecessary level from condSelfTestList.coverage.algorithmImpl	
1/2/2024	2.8.2	In required list for cavpItarAlgo, changed cavpCertName to certName to match property name	
		Removed algoIdValId field from cavpImplAlgo – not needed as internal Id number	
		Added certName property to algorithmImpl (used in secFunImpl and condSelfTest).	
		Added certName property to algorithmList in secFunImplList	
1/15/2024	2.8.3	Changed enum value in Self-Test tables from "Critical Functions" to "Critical Function"	
		Removed enum values in SSP Table, Related SSP column	This was not an exhaustive list and other entries could be typed in.
3/22/2024	2.8.4	Added certName to required properties for algorithmImpl	
		Changed commentsRound property in moduleInfo from string to integer	
		Removed propertiesList from cavpCertSet.cavpImplAlgoList	This was not used in the _module.json file and is now only part of the object model.
		Removed all enum values from schema	These will all be part of the module validation. Now, the schema will only change if the property names, types, or structure changes.
		Changed type and sfId columns in secFunImpList to sfTypeList, an array of objects with sfAbbrev, string and sfId, integer. Changed corresponding required properties	Supporting corresponding change in WebCryptik that allow multi-select.
