Chris Hughes3:25 PM
Abdul - Can we also have ConMon include Security Control Compliance Monitoring in scope as well, it's especially relevant for some of our public sector folks

Greg Thomas (ICAM ZTNA) HashiCorp3:26 PM
👍 I agree

A.Chetal3:26 PM
Exactly what Michaela is saying

Greg Thomas (ICAM ZTNA) HashiCorp3:28 PM
To follow the executive order they would need global identity so really it would need to be in Multi-Cloud for the S.A.... Correct?

Erik Johnson3:30 PM
Agree wiht Michaela that commonality and a holistic perspective on ConMon is important, even if there are multiple ATO boundaries

Chris Hughes3:31 PM
Team, I unfortunately have to hop at 3:30 today. That said, it is really exciting to see us starting to form into teams, get an idea of areas of focus and more. I'll be active in Slack and look forward to continuing to collaborate!

Erik Johnson3:31 PM
Including not just logging, but also ICAM, incident response, config/change management, etc.

Greg Thomas (ICAM ZTNA) HashiCorp3:31 PM
Thanks Chris!
