What are SCAP Validated Products?

- Products validated by the SCAP Validation Program
- The SCAP Validation Program
 - Provides product conformance testing for Security Content Automation Protocol (SCAP)
 - Provides end users with assurance that SCAP validated tools conform to SCAP and should be capable of processing well-formed SCAP expressed checklists

How do I use SCAP Validated Products?

- End users purchasing a tool from the validated products list has assurance that the product has met the test requirements defined in NIST IR 7511 and should process SCAP expressed checklists.

What is CPE?

- Structure naming scheme for information technology systems, software, and packages
- Includes formal name format, method for checking names against a system, and a description format for binding text and tests to a name
- The Official Common Platform Enumeration (CPE) Dictionary
