

**Richard T. Lazarick**  
Chief Scientist, GSS Identity Labs  
Computer Science Corporation

Mr. Lazarick is the Chief Scientist in biometrics for CSC Identity Labs and is a biometrics subject matter consultant to Department of Homeland Security (DHS), S&T and Transportation Security Administration (TSA). He is the CSC primary member on INCITS Technical Committee M1 – Biometrics.

He also is frequently a member of the US Delegation to ISO/IEC SC37 subcommittee on Biometrics Standards. He is currently editor of the ISO draft standard on Performance Testing of Biometrics for Access Control, and was co-editor of the recently published International Technical Report on Multi-modal Fusion.

Mr. Lazarick served for 8 years with DHS, Transportation Security Administration (TSA) Research and Development Laboratory, specializes in airport physical security, biometrics, and access control. He led the TSA team developing guidance to industry on biometrics for airport access control, published in October 2005. He also provided consultation on biometrics to TSA programs such as TWIC and Registered Traveler.
