

FIPS 201

Personal Identity Verification For Federal Employees and Contractors

National Institute of Standards and Technology
Information Technology Laboratory
Computer Security Division
100 Bureau Drive
Gaithersburg, MD 20899-8900

Basis for Requirements

HSPD-12: Policy for a Common
Identification Standard for Federal
Employees and Contractors

General Objectives

Common reliable identification verification for
Government employees and contractors

- Reliable Identification Verification
- Government-wide
 - Interoperability
 - Basis for reciprocity

Personal Identity Verification Requirements

HSPD-12: Policy for a Common Identification Standard

Secure and reliable forms of personal identification:

- ▶ Based on sound criteria to verify an individual employee's identity
- ▶ Is strongly resistant to fraud, tampering, counterfeiting, and terrorist exploitation
- ▶ Personal identity can be rapidly verified electronically
- ▶ Identity tokens issued only by providers whose reliability has been established by an official accreditation process

Personal Identity Verification Requirements

- Applicable to all government organizations and contractors
- To be used to grant access to Federally-controlled facilities and logical access to Federally-controlled information systems
- Graduated criteria from least secure to most secure to ensure flexibility in selecting the appropriate security level for each application
- Not applicable to identification associated with national security systems
- To be implemented in a manner that protects citizens' privacy

Personal Identity Verification Requirements

HSPD: Policy for a Common Identification Standard

- Departments and agencies shall have a program in place to ensure conformance within 4 months after issuance of FIPS
- Departments and agencies to identify applications important to security that would benefit from conformance to the standard within 6 months after issuance
- Compliance with the Standard is required in applicable Federal applications within 8 months following issuance

Community Concerns

- Agency investment in legacy systems
- Resource and time required to implement changes to existing systems
- Differences among Agencies regarding confidentiality and privacy requirements for identity information
- Differences among Agencies regarding which mechanisms are most effective with respect to:
 - Physical and logical security
 - Performance
 - Business issues

Phased-Implementation Approach

Two Parts to PIV Standard

- **Part I – Common Identification and Security Requirements**

- HSPD #12 Control Objectives

Examples: Identification shall be issued based on strong Government-wide criteria for verifying an individual employee's identity

The identification shall be capable of being rapidly authenticated electronically Government-wide

- Identity Proofing Requirements (revised from October draft)
- Effective October 2005

- **Part II – Common Interoperability Requirements**

- Specifications
- Most Elements (revised) of October Preliminary Draft
- No set deadline for implementation in PIV standard

- **Migration Timeframe (i.e., Phase I to II)**

- IAW HSPD #12, Implementation Plans for OMB before July 2005
- OMB approves agency plans and/or develops schedule directive

Part I

Personal Identity Verification Standard for Federal Government Employees and Contractors

- Promulgate Federal Information Processing Standard within 6 months
- Establish requirements for:
 - ▀ Identity Token (ID Card) Application by Person
 - ▀ Identity Source Document Request by Organization
 - ▀ Identity Registration and ID Card Issuance by Issuer
 - ▀ Access Control (Determined by resource owner)

FIPS 201 Part II

- Integrated circuit card-based identity token (i.e., ID Card).
- Standard at framework level with minimum mandatory implementation for interoperability specified.
- Basis for specification of issuer accreditation and host system validation requirements .
- Basis for specification of ID card, data base infrastructure, protocols, and interfaces to card.
- Card/token issuance based on I-9 Identity Source Documents, request by government organization, and approval by authorized Federal official.
- Biometric and cryptographic mechanisms.
- Supporting ICC Specifications in Special Publication 800-73

FIPS 201 Schedule

Delivery of Detailed Strawman Outline Components -	August 31, 2004
Finalize Technical Interagency Working Group Membership (TIWG) -	September 2, 2004
Announce First TIWG Meeting -	September 2, 2004
Announce Government Workshop -	September 3, 2004
Submit Public Workshop <i>Federal Register</i> Announcement -	September 3, 2004
Integration Meeting for Concept Draft Components -	September 3, 2004
Complete Strawman Content Proposal -	September 7, 2004
Distribute Concept to FICC IAB/TIWG Members -	September 8, 2004
Concept Comments to NIST for Review at First TIWG Meeting* -	September 14, 2004
First Meeting of TIWG -	September 15, 2004
Collect Initial Draft Component Submissions -	September 21, 2004
Completion of Working Group Comment Period -	September 22, 2004
Government-only Workshop Day -	October 6, 2004
Public Workshop Day -	October 7, 2004
Completion of Government Workshop Comment Period -	October 12, 2004
Assemble Preliminary Draft -	October 19, 2004
Completion of Public Workshop Comment Period -	October 21, 2004
Decision on Changes to Draft and Writing Assignments -	October 22, 2004
Completion of Public Draft of Standard -	November 8, 2004
Completion of Comment Period for Public Draft -	December 23, 2004
Completion of Revision of Standard -	January 13, 2005
Completion of Responses to Comments on Public Draft -	January 14, 2005
Delivery of FIPS Submission Package by NIST to DoC -	February 4, 2005
DoC Approval -	February 25, 2005

Items on critical path are in boldface.

* External actions

Major Issue Resolution Efforts

- Card Architecture: Coordinating with Interagency Advisory Board (IAB) on SP 800-73 Revision
- Biometric: Reviewing Biometric Data Requirements in Context of Use Requirements, Card Capacity, and Privacy Requirements
- Identity Proofing Process: Reviewing Position Criticality-Based Requirements in Context of Background Checking Capabilities and Intent of HSPD #12

Back-Up

Personal Identity Verification Threats

General Threat: Unauthorized access to physical facilities or logical assets under the protection umbrella of the PIV System and in which a PIV card is employed in access control processes.

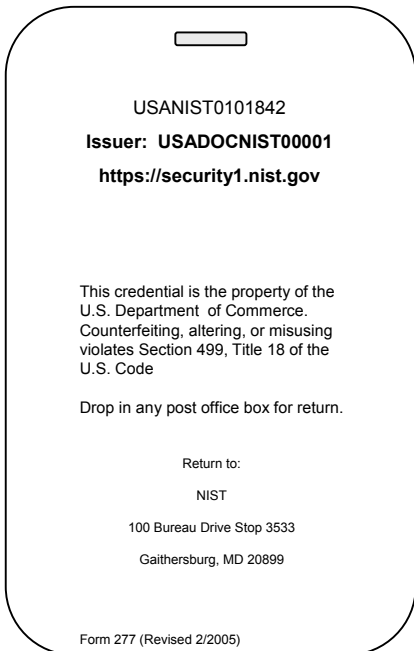

- Improper issuance of valid card to malicious holder
- Counterfeiting of cards
 - Intercept or probing to access stored information
 - Successful cryptanalytic attacks against stored protected information
- Use of stolen or borrowed card to gain access
 - Intercept/technical surveillance to capture PIN(s)
- Use of card issued for access to lower sensitivity/criticality assets to achieve access to more sensitive/critical assets

FIPS Development Process

- Public Announcement on Intent/Scope
 - HSPD-12: Policy for Common Identification Standard for Federal Employees/Contractors
 - Federal Register Notice #1: Scope/Workshop
- Draft Standard: Applicability, Foundation, Scope, Specifications, Implementations
- Government and Public Comments Solicited
 - TIWG Review and Federal Register Notice #2
- Revision of Standard: From Comments
- Publication/Promulgation of Standard
 - Federal Register Notice #3 announcing Standard

Phase I (Continued)

Mandatory Card Characteristics

Basic:

ISO/IEC 7810 Physical Characteristics

ISO/IEC 7816 Contact Chip

ISO/IEC 14443 (Parts 1-4 Draft) Proximity Card

ISO/IEC 24727 (Future) Interoperability Specification
[NIST IR 6887]

Mandatory Features Specification*:

Cryptographic (2048 Bit RSA, 256 Bit AES,
SHA 256)

Fingerprint Image Specification

Photographic Image Specification

* Illustrative examples only

100 Bureau Drive Stop 3533

Gaithersburg, MD 20899

Form 277 (Revised 2/2005)

Phase I (Continued)

Mandatory Card Content

Electronic Content Digitally Signed By Issuer:

- Digital Photograph (1 or 2)
- Digital Fingerprint Images (Left and right index)
- PKI Certificates (One per access level)
- User Identity (Card number?)
- Issuer Identity

Logic Elements:

- Cryptographic Digital Signature
- Cryptographic Challenge/Response?
- Encryption/Decryption
- Key Variable Processing (PIN-based notarization?)
- Biometric Data Processing

Phase I (Continued)

Optional Card Content

Electronic Content Digitally Signed By Issuer:

- Employee/Contractor Status
- Second Digital Photograph
- Ten Finger Digital Fingerprint Image
- Card Holder's Signature (Ties card to holder)
- Emergency Responder Designation
- Date of Issue
- Height
- Hair Color
- Eye Color
