

### NTER: National Training and Education Resource

# An infrastructure for next generation learning

Energy Efficiency & Renewable Energy

#### Current State of Classroom Education

- We don't do anything like we did 20 years ago, but we educate our kids the same way we did a century ago
- Lecture format seen as irrelevant for today's students who are plugged in everywhere but when they are at school
- Schools in some large cities have only a 50% high school graduation rate (WH announcement, March, 2010)
- Of all OECD countries, US has the highest non-completion rate (over 50%) for students who start a tertiary education program

- New Learning Tools make possible:
  - Highly interactive environments
  - Inquiry-based learning \_\_\_\_
  - Bridge theory to practice (explore, operate equipment without the consequences of failure)

inter-

- Varied and Contrasting examples \_\_\_\_
- Demonstration
- Access to expertise
- Feedback

U.S. DEPARTMENT OF

- Continuous assessment
- Collaborative environments
- Endlessly patient medium \_\_\_\_

Source: National Training Laboratories, Bethel, Maine

#### Learning Pyramid

- Just putting the same material online does not solve the problem
- Current methods to produce online, immersive education:
  - Expensive (\$50B per year)

U.S. DEPARTMENT OF Energy Efficien ENERGY Renewable En

Energy Efficiency 8

- Little to no interoperability of online resources
- Costly to maintain & update
- Platform wars have prevented updating and improvement of online resources
- Metadata wars have not been resolved for cataloging online resources
- Repository wars have not prevented gross duplication of materials
- Firewalls in schools, universities and agencies often prevent access to online resources

**ENERGY** | Energy Efficiency & Renewable Energy

Support the growth of a capable and flexible workforce by providing quality education and training easily and efficiently through the advances of information technology and recommendations of learning science.

- Create a flourishing ecosystem for next generation learning content
- Develop easy-to-use tools to empower anyone to develop engaging content
- Integrate with existing online projects and standards to amplify individual efforts
- Leverage the power of social media to enable collaboration and improvement of online materials
- Use the flexibility of open source licensing to grow and develop the platform and tools

- Enhanced Reliability and Quality open source has been quality assured by a large team of testers on more technical platforms than a commercial vendor could afford or consider
- Open Source Communities Find and Fix Bugs More Quickly
- Security Patches are Released More Quickly often more secure than classic commercial software
- Benefits of a Community of Practitioners the benefits of customers, developers and project team members all working together in a extensive, large community; and
- The open source model builds open standards and achieves a high degree of interoperability
- Endorsed by NSA for ability to deliver security at a lower cost

#### NTER by the Numbers

Subsystem	Function	Lines of Code	Main Sponsor
Ilias	Course Management (LMS)	1,300,000	DOD/NATO
Liferay	Enterprise portal (for displaying and configuring other services)	2,150,000	Cisco
MySQL	Database Management System	1,280,340	Oracle
Jasper	Reporting Engine	228,856	Jasper
Apache	Web Server Software	248,980	Apache
Apache-httpd	More Web Server Software	438,785	Apache
Solr	Full text search & navigation	854,662	Apache
Nutch	Web-search software	82,181	Apache
Hadoop	Support data-intensive distributed applications in the cloud	1,343,735	Yahoo! / Apache
WebGL (deprecated O3D)	Enables browser-based interactive content	34,369	Google
Total		7,961,908	

#### Leveraged code valued at \$600M -- \$800M

- Advanced Authoring Tools make it easy, and inexpensive, for organizations to build, and deliver state-of the art learning experiences and continuously improve them
- An eLearning Repository with Advanced Search capability gives access to thousands of courses that can be used as is, edited or used as individual searchable content objects to jumpstart course development
- A Learning Management System for collaborative development, delivery of online & eLearning content

#### What does NTER <u>do</u>?

U.S. DEPARTMENT OF Energy Efficiency & ENERGY Renewable Energy

Energy Efficiency &

#### **NTER Branding Examples**

- Build 3D simulations without programming
- Runs in browser; no heavy downloads

#### Trading this....

## For meaningful, performance-based assessment

Leaky, recessed light fixtures can cause:

- C Electrical problems
- Ice dams
- C Furnace malfunction
- O All of the above
- Poor light quality
- Submit Answers

Correctly install the proper type of wall joint to complete the structure.

#### Commercialization

#### 4 ways to build a market:

- 1. Courses
- 2. Instruction (blended)
- 3. Content
- 4. Degrees / certificates

 Icons allow users to identify permissions

•Presents information about source

#### Supports Traditional & Advanced Training Materials

<ul> <li>By reviewing this lesson, participants will:</li> <li>Know the proper location of thermal and air barriers</li> <li>Recognize the driving forces of air leakage</li> <li>Understand the connection between air leakage, energy waste, and moisture problems</li> <li>Understand how air ducts effect pressure balance within the home</li> <li>Understand the principle behind the blower door as a tool for measuring air leakage</li> </ul>

#### Recent NTER Accomplishments...

- Searchable Virtual eLearning Content Repository a clearing house for high interest content with advanced search capability
- Enterprise eLearning Platform NTER can launch, track record progress and generally manage eLearning content without licensing costs
- Agency Customer (External) Training at least 1.3 million external learners need this service
- **Collaboration Tools** Includes, web boards, wikis, blogs, rosters, calendars, and other collaboration and course management system capabilities
- Sophisticate 3d Authoring Tools NTER provides sophisticated authoring capability, with a library of 3D content SCOs; and
- **508 and more** Tools are provided to help authors create 508 compliant materials and meet next generation standards for accessibility. Integrated NCAM media player (support for screen readers and Closed captioning)

- 6 Weatherization Centers
- Under consideration by 4 other cabinet level agencies and emergency response training center

### **TECH SPECS**

DEPARTMENT OF

ENERGY

Energy Efficiency &

Renewable Energy

- Nutch: an open source web search engine based on Lucene Java for the search and index component.
- Solr: an open source enterprise search platform from the Apache Lucene project
- Shibboleth: federated identity-based authentication and authorization infrastructure based on SAML
  - Security Assertion Markup Language (SAML): an XML-based open standard for exchanging authentication and authorization data between security domains, that is, between an identity provider (a producer of assertions) and a service provider (a consumer of assertions.) SAML uses a SOAP binding within an HTML message.

• Database Server software: MYSQL or MSSQL

U.S. DEPARTMENT OF

Energy Efficiency & Renewable Energy

- MYSQL: relational database management system (RDBMS) that runs as a server providing multi-user access to a number of databases under General Public License, as well as under a variety of proprietary agreements.
- MSSQL: a commonly used relational database server, developed by Microsoft

- Cloud Services:
- Amazon web services
  - Hadoop (software framework that supports data-intensive distributed applications under a free license)

• Apache-HTTPD (web server software)

Energy Efficiency &

Renewable Energy

DEPARTMENT OF

ENERGY

- Liferay (Liferay Portal is a free and open source enterprise portal written in Java and distributed under the GNU Lesser General Public License and under proprietary licenses)
- Java and PHP programming languages
- Jasper Reports: JasperReports is an open source Java reporting tool that can write to screen, to a printer or into PDF, HTML, Microsoft Excel, RTF, ODT, Comma-separated values and XML files. Used in Java-enabled applications, including Java EE or Web applications, to generate dynamic content

- **RESTful**: a style of software architecture for APIs
- **SOAP APIs**: Simple Object Access Protocol, is a protocol specification for exchanging structured information in the implementation of Web Services in computer networks. It relies on (XML) for its message format, and Hypertext Transfer Protocol (HTTP) or Simple Mail Transfer Protocol (SMTP), for message negotiation and transmission.

- **ENERGY** Energy Efficiency & Renewable Energy
  - Kuda: an advanced JavaScript library and World Editor that enables web developers to quickly build interactive 3D web solutions. Allows abstraction of the complexity of 3D behaviors into easy to use building blocks for common functions, allowing developers to create compelling user experiences by setting up a complex sequence of events that respond to user input.
  - WebGL: a software library that extends the capability of the JavaScript programming language to allow it to generate interactive 3D graphics within any compatible web browser. WebGL code executes on a computer display card's Graphics Processing Unit (GPU), which must support shader rendering
  - **three.js**: There are several developer libraries for WebGL development, three.js being another
  - **HTML5**: a language for structuring and presenting content for the World Wide Web, and is a core technology of the Internet. An aim of the most recent version 5 has been to improve the language with support for the latest multimedia while keeping it easily readable by humans and consistently understood by computers, devices, and web browsers.

- JavaScript: JavaScript is a prototype-based scripting language, is a multi-paradigm language, supporting objectoriented and functional programming styles.
- 3D modeling / Collada: COLLADA is an open standard (COLLAborative Design Activity) for establishing an interchange file format (via XML schema) for interactive 3D applications. Allows for exchanging digital assets among various graphics software applications that might otherwise store their assets in incompatible file formats.

#### **E-commerce:**

- NTER supports an e-commerce system if allowable
- PayPal

**Future Development Plans** 

**Currently Planned NTER Enhancements** 

ENERGY | Energy Efficiency & Energy Efficiency &

- **Enhanced SSO**
- Accessibility
- eCommerce capability

Energy Efficiency &

- **Ontology Support**
- Additional LMS Support
- **Future NTER Enhancements** 
  - Enhanced ontology support
  - **Enhanced** eCommerce
  - **Rich Authoring**
  - Learning Registry and other system integration
  - Intelligent tutor
  - **IP** Protection
  - Additional Content Areas
  - Improved Mobil Support

#### So what's really new?

National Training & Education Resource (Beta)

Distributed search (end the portal wars: enables customized control and real sharing across institutions)

Energy Efficiency &

ENERGY Energy Efficiency & Energy Efficiency &

- Deep content search (end the metadata wars)
- Authoring tools for 3D content creation (the SME can create rich content)
- 3D simulations in browser (no download)
- Integrates with commercial game engines (for deeper immersion)
- Integration platform (to address the fragmented education and training space)
- Assessments in 3D environments (ties to the learning management system broadens assessment options)
- Portlets (custom tools)
- Skinning (for personalization)
- Social media tools (rate courses to help improve the content)
- Sign In Create Account Home Courses About Authors Forum Learn new skills and advance your career NTER provides easy access to online courses with 3D activities to enhance your learning experience Update your existing knowledge or enter a new field -Get started today! **Browse Courses** This BETA version of NTER is preliminary and may change without notice.
