Seamless Interoperability

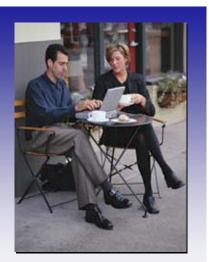

From Work

To Home

In Airports Even Cafés & and Hotels Restaurants

One standard everywhere!

Wi-Fi Alliance Mission

- Certify interoperability of IEEE 802.11 products
- Promote Wi-Fi as the global wireless LAN brand across all market segments, including the home, small office, large enterprise and public access areas

Wi-Fi Alliance Background

- Internationally recognized wireless LAN standards
 - IEEE 802.11b and 802.11a
- True "Ethernet" speeds
 - 11Mbps and 54Mbps
- Excellent range
 - 30-50 meters typical
- Price competitive
 - multiple vendors → increased volume and reduced costs
- Independent test labs
 - North America, Europe and Asia (two locations)
- Safe buy for consumers
